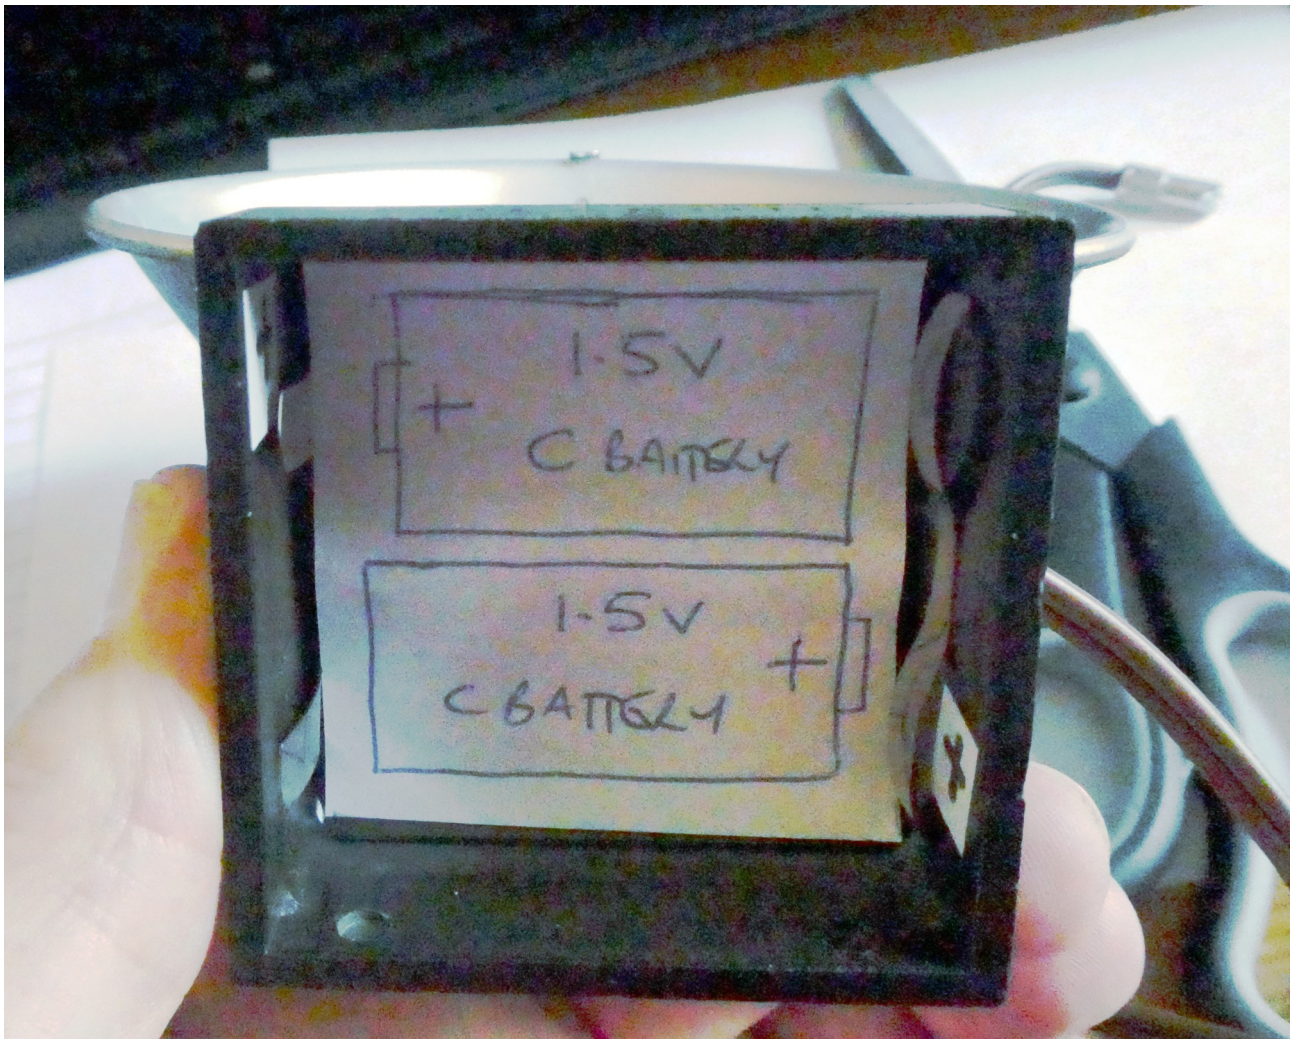
POLAROID #200 REGULAR FLASH GUN USER MANUAL

Compatible Flash Bulbs: 5, 5B, Press 25, Sylvana SF, General Electric SM
Test Light: Miniature Bulb (3.5V 1W) E10/MES (Miniature Edison Screw)
Batteries: C Type (1.5V)



The #200 flash gun is designed for the Model 95 land camera. It uses two batteries to power the Flash Bulb and Test Light.

Insert two C Type batteries as shown in the photo, noting the polarity and orientation of both batteries. The batteries work in series to provide 3V for the Flash Bulb and the Test Light.

When the Flash Bulb is inserted and the cable plugged into the Model 95 camera then a flash will occur when the shutter is pressed.

When ***no*** Flash Bulb is inserted then the Test Light illuminates for the duration of the shutter press, in both the I and B positions.
